

HID® Signo™ Keypad Reader 40K

Overview

The Signo™ Keypad Reader was wired into a Net2 Plus and tested with multiple tokens on Net2 v6.07.

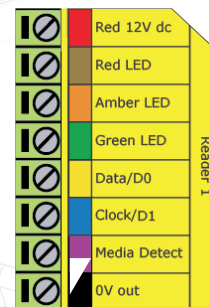

The token format used was the HID Seos.

The response from the reader LED's; Red - Access denied, Green - Access permitted. Colours can be configured within the HID app.

We now have an integration for customers who want to use HID® SEOS tokens whilst still being able to incorporate PaxLocks into the Net2 system. To find out more, head to [APN-1214](#).

Cable Pinout	ACU terminal
RED	+12V
